

Dalhousie Conference on University Teaching and Learning

LEARNING OUTSIDE THE CLASSROOM

April 28 and 29, 2010

Across the life span, learning is a constant. In all aspects of our lives we continually acquire, apply, create, and communicate knowledge. Within postsecondary education settings faculty in diverse disciplines harness this natural dynamic in the ways we engage students in learning as they solve authentic problems in our disciplines. Whether it is conducting research to critically examine historical events or literary works, designing and/or conducting lab or field projects, or learning and applying knowledge in clinical settings or community-based projects, students – by design – spend a significant amount of time learning outside our classrooms.

The Centre for Learning and Teaching invites you to join us at a conference focusing on the many ways our students learn outside the classroom.

Keynote Speakers

Dr. Gary Poole

Centre for Teaching and Academic Growth
University of British Columbia

Presenting: **When Students “Move In”: Turning learning spaces into learning homes**

Dr. Angie Thompsn

Human Kinetics
St. Francis Xavier University

Presenting: **Recognizing and Embracing Teaching and Learning Experiences Outside the Classroom**
